WATER QUALITY REPORTS

Rainbow's **Annual Water Quality Report**, which summarizes the results of our water testing in 2025, is available online. You may view the current and prior year reports under our website's Water Quality menu at <https://www.rwdonline.net/CCRs>, or jump directly to this year's report with this link: <https://www.rwdonline.net/files/dd51e6ac0/2025RainbowReport.pdf>

Rainbow is happy to offer various levels of service in support of smaller neighboring water systems. Each of these water systems have their own governing board and their own water sources, but Rainbow helps prepare the annual water quality reports unique to each system. Please share this information with anyone who drinks this water (or their guardians), especially those who may not have received this report directly. If you are one of our contract district customers, your annual report was sent directly to you by paper mail or email but you may also find a link to your own report here:

See our *Weekly Watering Recommendations* every Thursday to know how much to water. Find us on the web at RWDOnline.net or use the [Facebook](#) link for Rainbow-Water-District.

WATER CONSERVATION

Summer has begun with above average temperatures, and our portion of eastern Lane County is already experiencing severe drought conditions. Forecasters tell us there is a 63% chance of a very strong El Nino forming later this year, which could lead to a hotter and drier winter continuing drought conditions next year.

The McKenzie River is sustained by a massive basalt aquifer that maintains consistent flows even during longer dry spells, but the wells we rely on still feel stress when we do not have rain to help replenish the water stored below ground. You can help us by using water wisely and conserving where possible. This will help us stretch our resources, and lower your water bill too!

Rainbow's office hours are 8 am to 5 pm, Monday through Friday. You may call us at 541-746-1676 or reach us by email at office@RWDOnline.net with questions or if you need assistance of any kind including to request a paper copy of your water quality report.
